

## **Lens Removal Procedure Using a Suction Cup:**

To safely and effectively remove the lens from the sign frame, follow the steps below:

### **1. Position the Suction Cup:**

Firmly attach the suction cup to the *\*top center\** or *\*bottom center\** of the lens. Ensure the surface is clean and dry to allow for a secure grip.

### **2. Apply Even Pressure:**

Once the suction cup is in place, grasp the handle and pull straight outward from the sign face. This direct, even pressure helps disengage the lens from the frame.

### **3. Remove the Lens:**

As the lens releases from the frame, continue to support it with your free hand to prevent it from falling or shifting unexpectedly.
